

CLEAN™

An inoculant preparation containing mycorrhizal fungi.

Composition:

Mycorrhizal content: 0.2 % w/w

Rhizosphere bacteria content: 1×10^9 CFU/g

The product does not contain genetically modified and pathogenic organisms (salmonella, faecal coliforms, aerobic mesophilic organisms and nematode eggs).

Characteristics:

Clean is a bio-stimulant that promotes the development of a strong root system and builds resilience to stress. It is a preparation of beneficial mycorrhizal fungi that through the biodegradation of environmental pollutants can reduce the bioburden for the plant.

Dose rates and methods of use:

Foliar

Vegetable, Fruit,	2-3 kg/Ha applied
Ornamental	in 800-1000 L/Ha
crops	water

Fertigation

Vegetable, Fruit,	3 kg/Ha applied
Ornamental crops	in 500 L/ha water

Warning:

Do not mix with other products.

Store at temperatures between 5 ° C and 40 ° C.

Suitable for use in organic farming
